

ZINC

>> 60 LOZENGES | 0300209.060

**SUPPORTS HEALTHY IMMUNE SYSTEM,
NERVE FUNCTIONS & CELL DIVISION***

GREAT TASTING LOZENGE

>> **Zinc** is an essential mineral and free radical fighter found in cell in the body. It is critical for a wide range of physiological functions and is an important cofactor for more than 200 enzymes, more than any other mineral.* **Zinc** supports immune system health & function and proper collagen formation, bone health and muscle function.*

✓ These tasty lemon Zinc lozenges are a truly superior tasting delivery system. It contains zinc in the citrate form to support optimal immune system function, which is especially important during the winter months.* The lozenge form also works well to support the tissues of the throat.*

Recommended for:

- » Management of oxidative stress and cellular damage*
- » Fertility, healthy reproductive organ function*
- » Immune support, especially in winter months*
- » Joint and skin support (including skin blemishes)*
- » Smokers and those exposed to second-hand smoke*

Why Zinc?

✓ "Some 90 percent of the population consume diets deficient in zinc," according to Dr. Harmond M.D., Ph.D. the father of the free radical theory of aging. And even those eating adequate amounts of zinc do not always absorb it adequately.* A zinc deficiency can lead to osteoporosis, knee & hip discomfort, mental disorders, memory loss, depression, fatigue, irritability, decreased sense of taste & smell, skin problems (acne, dry skin, stretch marks, and prolonged wound healing), poor hair growth, imbalanced cholesterol and glucose levels, decreased immune function, growth impairment, menstrual irregularities, fertility problems, prostate challenges, low testosterone levels, low sperm count and impotence.*

Zinc Supports:

- » Superoxide dismutase activity, an important cell-protecting enzyme*
- » Immune system health and function.*
- » Collagen formation, bone health and muscle function.*
- » Protection against UV radiation*
- » Fertility and reproductive system health and function*
- » Normal cell division*
- » Normal growth and development*
- » Brain development and nerve function*
- » Insulin activity, carbohydrate metabolism, and amino acids synthesis*
- » Enzyme and hormone synthesis and function*
- » Removal of waste materials and liver detoxification processes*
